

Microsoft Licence Optimisation Suite

The fast, easy, accurate way to maximise value from your Microsoft licences and solution functionality

LIMITED FREE INTRODUCTORY OFFER*

Microsoft licensing can be complex. What's more, organisations need to be sure they are gaining maximum value from their Microsoft business applications.

Well, now we've made everything simpler! Microsoft Licence Optimisers are advanced, automated analytics wizards and methodologies that can be run with assistance from Mint experts, and with minimal time input from you.

*This valuable service and the resulting reports are completely FREE for a limited introductory period.

Reveal Financial and Functional Benefits, Fast

The Optimisers suite is designed to reveal clear financial and functional benefits for your business. Take the first easy step to achieving a clear view of:

Licence use and user adoption by role/business function

Licences versus user needs and evolving business requirements

Potential under-utilisation of Microsoft solution capabilities

Opportunities for increased operational efficiencies and cost savings

Advanced Licence Optimisation for your Microsoft Solution

How the Licence Optimiser Works

The Optimiser can highlight under-utilised licences and is a first step to revealing under-utilisation of solution functionality and scope for increased operational efficiencies and cost savings.

A custom Licence Optimisation report is then produced – including both business summary and key recommendations – to help you to maximise your Dynamics 365 investment.

- ✓ Advanced, automated analytics
- ✓ Quick and easy to run
- ✓ Minimal input needed from you
- ✓ Read-only access required
- ✓ Aligned with the latest Microsoft licensing guide
- ✓ Output is a custom report with clear 'How to maximise value' recommendations
